

“It is part of the school’s responsibility to teach people how to use the technology they will need to do their job... and today, DTS really feels like it’s necessary to teach people how to use Bible software.”

John Dyer

Executive Director of Communications and Educational Technology;
Dallas Theological Seminary

At Dallas Theological Seminary (DTS), the Enterprise Purchase Program equipped students and faculty with a custom library of resources comprised of required textbooks, core study materials, and a DTS Heritage Collection of resources.

The Challenge

Dallas Theological Seminary has expanded its nontraditional educational options to include more online course delivery as well as extension campuses and church-partnered extension sites. Many of these nontraditional students have commitments outside of seminary to full-time jobs, family, and church; lending less time to study.

DTS needed to equip both traditional and nontraditional students with the tools and resources they would need for study—not only at seminary, but also in ministry for years to come.

The Solution

Through Faithlife’s Enterprise Purchase Program, DTS received Logos Bible Software to equip their students and faculty with the key tools and resources they would need for study and future ministry at a fraction of the cost.

DTS underwrote the cost through donor support and a small portion of the technology fee at no additional cost for the student. Students receive these resources on day one of their seminary studies and are gifted their Logos research library upon graduation.

The Results

Increased Visibility and Recruitment
The partnership has given visibility to the DTS brand and excitement from potential students about getting Logos. The web page DTS.edu/Logos has become one of the most trafficked pages on the DTS website.

Increased Educational Outcomes
Professors at DTS know every student, both traditional and nontraditional, has access to the same set of core resources—leveling the educational playing field and increasing educational outcomes.

Lower Costs for Students
Students save between \$300–\$700 on the hidden cost of textbooks.
