

SECTION 2: MINISTRY AND TRAINING INFORMATION

During the quarter under review October to December I continued to train my church leaders and members the importance of child protection and prevention. After receiving intensive training from Tehila Team that came from England.

Since child Abuse in Zambia is on daily bases, it is very important for every body to be aware. Child abuse is in many ways such like denying child education shelter health care, child labour. Some times abusers they entice children with giving them money or buy them sweets, eventual they rape them, which is a crime.

So far we have formed a committee in the church that looks at these issues serious. We are working with Zambia police to make sure the caprites are brought to book. We are working both in the church and in the community to see to it that children are living in safe environment.

During the same period we had a good Christmas celebration. First of all we sang Christmas songs after that I preached then we prayed. Since it was on Sunday, we arranged that church members should bring food from their homes that we eat together as one family.

It happened that Christians came with food from their homes and we had a good time of eating together as one family.

It brought lot of excitement among the church members.
