Wisdom Versus Folly

Among the different genres of the Hebrew Bible, wisdom literature serves an important role. The three main sections of the Hebrew Bible include the Law, the Prophets, and the Writings. Within the Writings, books that are typically included in the wisdom literature are Psalms, Proverbs, Ecclesiastes, the Song of Solomon, and Job, though not every psalm might fall into the category of wisdom literature. There is a sense in which wisdom literature addresses the gap between the law, the express commands God gives to his people, and life. The law is expansive, but no amount of legislation can address every conceivable question or circumstance in life. Thus, when the law leaves no signposts at a fork in the road, wisdom gives readers a compass to find their way. The bulk of Proverbs is traditionally attributed to King Solomon (1:1), though it is possible that an inspired editor included the wisdom sayings of others, such as the Thirty Words of the Wise (22:17–24:22), King Agur (30:7-33), and the mother of King Lemuel (31:1-9). The overarching theme of the book is to contrast the way of wisdom, ultimately a fear of the Lord, with the way of the fool (1:7).
