

The Taylors to Belgium

The renovation of the building is coming to an end. The heating has been updated, the kitchen is basically installed, fireproofing / soundproofing is 90% done and most of the electricity has been brought up to code. The cleaning after this kind of work is relentless. There are still finishing touches that we will need to finish as we find the funds. We still need a lift for our elderly and handicap members and we will need to continue updating electricity work in some of the classrooms

We had our annual Thanksgiving service November 10. We had over 85 for the day. I made an appeal to our people that our goal was to invite people interested in the Lord. not just a fred meal We had several first time visitors and 25 plus people we know that were lost. our building was maxed out. The Lord was lifted up and the gospel was and seed was planted. Some of our ladies came and painted the entrance before our big Thanksgiving dinner.. We were thrilled to have our heating man and his family as well as our contractor in our services.

When Jean and I arrived in Belgium in March of 1978, one of the first people we met was a women named Monique. She was a faithful member of the church we were attending at the time. When we started in Auderghem, she asked Bro Duniho, her pastor, if she could go with us and she has been with us ever since. The last few years she was been bed ridden and miserable. She passed on to glory this past week. We will miss our praver warrior.

Our next furlough will be in January and February 2024. We will be in the south east. If you would like us in your services please e-mail me at larryt1belge@me.com.

Please pray for Constantan, Arleon,(his family), Jean Pierre, Danielle, Didier, Silvie, Rose, Ed and Andre for salvation.
